10. Program Educational Objectives	
The Program Educational Objectives (POEs) of the Nursing Nursing department (ELCE) are to prepare graduates who will: 1. Enhance Community-Oriented Nursing Practice: Prepare graduates to address the health needs of individuals, families, and communities in the Kurdistan Region through culturally competent, preventive, and promotive care, with a strong emphasis on primary health care and rural outreach. 2. Foster Research and Evidence-Based Practice: Develop students' abilities to engage in nursing research and apply evidence-based findings to improve clinical practice, healthcare delivery, and public health outcomes within the regional context.	

3. Promote Leadership and Health Management Skills: Equip future nurses with the leadership, communication, and management skills necessary to contribute effectively to healthcare teams and systems, while supporting the development and reform of community health infrastructure in Iraq.

11. Program learning outcomes

After completing this program, students should have:

1. Demonstrate safe and competent clinical nursing care across the lifespan using the nursing process in diverse health care settings.
2. Apply evidence-based knowledge and research to inform clinical decisions and improve patient and community health outcomes.
3. Communicate effectively and professionally with patients, families, and health care teams to deliver collaborative care.
4. Lead and manage nursing care teams with ethical integrity, cultural sensitivity, and awareness of regional health needs.
5. Promote public health and disease prevention through education, outreach, and participation in community-based health programs.
6. Engage in lifelong learning and professional development, maintaining competence in evolving health care systems and technologies.
